

Ph.D Studentship Announcement

We are seeking a highly motivated Ph.D. student to join the newly established lab of Dr. Bronwyn Barkla in Plant Science at Southern Cross University to work on a project investigating abiotic stress tolerance in crops and model stress tolerant plants employing proteomics approaches. The successful candidate will have experience in one or more of the following areas; molecular biology, protein biochemistry, proteomics, or related fields, and will be expected to conduct high-quality, independent research. Above all, the candidate will be ambitious and motivated, being able to demonstrate enthusiasm and insight for the project. The candidate must hold, a Master by Research Degree (or must be finishing a Master degree) or equivalent diploma, and must have an exceptional academic record. Experience in research is essential.

Please contact Dr. Barkla for further details or informal enquiries.
